## WHITEPAPER

2024

# ABSTRACT

Our imagination is much bigger than the world in which we live. But the world we live in is limited by our human bodies, the laws of nature, physics, and time.

Welcome to ZenyxQord, a virtual computing platform for seamlessly blending the virtual world with the physical world built on blockchain. Welcome to the world without limitation.

Our platform chooses to advance in the era of spatial computing, browsing, ZenyxQord, and experience the latest in business communication, education, entertainment, shopping, commerce, services, even in search, and much more.

Imagine a world where you can create anything you can imagine, explore a metaverse world full of adventure, create and produce panoramic images based on descriptions provided using AI (artificial intelligence) technology, travel to all places in the world simply by wearing your VR headset, hold face-to-face meetings on the other side of the world without leaving your living room, and much more.

Imagine that everything can be done within your grasp.

Welcome to ZenyxQord.

# INTRODUCTION

ZenyxQord is a decentralized blockchain with a virtual computing platform to seamlessly blend the virtual world with the physical world and revolutionize the era of spatial computing. Zenyx is a blockchain with a decentralized XII algorithm to support the Qord platform designed for AR/XR integration.

Through the Qord Platform, users can be more efficient in virtual integration in the spatial computer era, which is supported by various features.

It is a universal platform that will connect games, decentralized applications, and virtual reality.

With our revolutionary development and the combination of the latest generation of new technologies and highly skilled workers, we offer users a different experience than anything ever seen before.

We have designed ZenyxQord by working together with empowered users to build and develop the future of the world itself so that it can revolutionize the world. Users can build, create, and trade both safely on the ZenyxQord platform.

## HOW TOKENOMICS WILL IMPROVE THE WORLD

ZenyxQord Tokenomics has been designed to encourage new users to explore the world while motivating users to build, complete quests, and further develop new worlds together. These incentives will drive the accelerated adoption and growth of ZenyxQord.

This will keep users engaged and coming back for more. This will be good for users but also for entrepreneurs, the corporate world, and advertisers who want to be in their place as potential customers.

- More Users
- More Entrepreneurs
- More Business
- More Advertisers

ZenyxQord will become economically independent. Traditional businesses will be transformed on ZenyxQord, where they can sell and promote their digital and real-world goods and services. We will enable the creation of new business models and a new generation of digital entrepreneurs, removing barriers for them to deliver innovative goods and services to the ZenyxQord Platform.

Zenyx crypto coins will be used to buy and sell goods from traders and creators. ZenyxQord World will be the place where people will come to work, study, rest, shop, and play.

## QORD CONCEPT

The Qord platform is an application that allows users to create unlimited virtual worlds and customize them using an easy and intuitive backend.

### » BUILT-IN AI

Artificial Intelligence (A.I.) technology to generate panoramic images based on user-provided descriptions.

### » VIRTUAL 3D

3D views help you see connections to each other in space, which is great for showing complex environments and designs.

### » CLOUD SERVERS

Cloud storage allows you to safely store all your virtual goods, such as images, videos, 3D models, and other media, and can grow according to your needs.

## QORD PLATFORM

The Qord platform is an application that allows users to create unlimited virtual worlds and customize them using an easy and intuitive backend. The Qord platform consists of:

### » *SOCIAL INTERACTIONS*

The phrase implies the use of technology to make social interactions and online networks smoother, bridging the gap between the physical and virtual worlds.

### » *MULTIPLE LAYERS*

Multiple Layers add depth and detail to virtual environments, making them more organized, visually appealing and immersive.

### » *VIRTUAL STAGING*

Advanced tools for visualizing space can display before and after versions of the panorama simultaneously by splitting the screen.

### » *BUILT-IN SHOP*

A complete platform for businesses to showcase, market and sell products, offering customers a unique and interactive shopping experience.

## **QORD PLATFORM**

### **» COMPATIBLE VR HARDWARE**

Compatible VR hardware is a device that is built to work with virtual reality technology, providing an immersive VR experience.

### **» 360-DEGREE VR VIDEOS**

360 Degree VR Video is the key to making virtual worlds more immersive, providing users with engaging and realistic experiences.

### **» PRESENTATION HUB**

Presentation Hub is a feature that gives users easy access to their entire virtual world on one page.

### **» WORLD MAP VIEW**

Allows users to see their entire virtual world on a map, giving them a global perspective of their virtual environment.

### **» VIRTUAL VIDEO EDITOR**

Enhance videos by adding text, images, and audio or animation, so that the content is more interesting and dynamic.

# ZENYXTOKENOMICS

Zenyx is a true cryptocurrency with a GPU-based PoW mining and masternode concept. Zenyx is a GPU-based cryptocurrency that uses the X11 algorithm as proof of work. It offers several advantages and incorporates a masternode system.

## SPECIFICATIONS

Reward :

2,400 ZENYX

Max Supply :

170,220,240 ZENYX

Block Time :

2 Minute

Masternode Collateral :

170,000 ZENYX

## REWARD DISTRIBUTIONS

PROOF OF WORKS : 50%

MASTERNODE : 50%
